

# Templates - Green Dream v. 0.1

This template was created by Ivo Toman, a freelancer from the Ivorius webdesign – <http://ivorius.com/webdesign/> .

## Features

- valid, tableless, semantic XHTML 1.0 Strict & CSS code
- prepared for brilliant outcome in Google, Yahoo and etc. (SEO)
- tagging of articles
- great browser compatibility (renders correctly in Firefox, Opera, Internet Explorer 6+, text browsers)
- page About - easy customizable through article
- archives according date and category
- well organized template pages structure (many reusable chunks of code are separated into forms)
- print style

***There are two possibilities for installation of the template into the textpatternu .***

- 1) The easier one – usage of the plugin for the textpattern
- 2) Absolutely controlled one – copying of pages, forms and styles.

### AD 1)

#### a) Upload img and template

Login to your account by using an ftp client and upload folders img and \_template to web root.

#### b) Upload and activate plugins (All Plugins are located in folder Plugin)

Login to your textpattern account and go to **Admin -> Plugin**. Plugins for textpattern are in the folder plugin. Every plugin open step by step in the text editor and the content insert into the field called Install Plugin and choose Upload. Now you see a Preview plugin, then scroll down and choose Install. After the instalattion of all plugins do not forget to activated them.

#### c) Installation of template

After activation of plugins go to the **Extensions** and select green\_dream in the field called Which template set would you like to import? -then click on Go.

### AD 2)

#### a) Upload img

Login to your account by using an ftp client and upload folder img to web root.

d) Upload and activate plugins (All Plugins are located in folder Plugin)

Login to your textpattern account and go to **Admin -> Plugin**. Plugins for textpattern are in the folder plugin. Every plugin open step by step in the text editor and the content insert into the field called Install Plugin and choose Upload. Now you see a Preview plugin, then scroll down and choose Install. After the installation of all plugins do not forget to activate them.

b) Installation Pages (All PAGES template are located in folder PAGES)

Go to **Presentation -> Pages** and

- replace **default** by the content of file **default.txt** which you find in the folder pages
- replace **error\_default** by content of file **error\_default.txt**
- replace **archive** by content of file **archive.txt**
- create a new page and called it **About**. Insert the content of the file **about.txt** into it.

c) Installation Forms (All FORMS template are located in folder FORMS)

Go to **Presentation -> Forms** and

- replace form **default** by content of file **default.article.txt**
- replace **plainlinks** by content of file **plainlinks.link.txt**
- replace **comments\_display** by content of file **comments\_display.article.txt**
- replace **comments** by content of file **comments.comment.txt**
- replace **comment\_form** by content of file **comment\_form.comment.txt**
- create a new form **excerpt**, upload the content of the file **excerpt.article.txt** and hold up Type: article
- create a new form **sticky**, upload the content of the file **sticky.article.txt** and hold up Type: article
- create a new form **x-head**, upload the content of the file **x-head.misc.txt** and hold up Type: misc
- create a new form **x-body**, upload the content of the file **x-body.misc.txt** and hold up Type: misc
- create a new form **x-head**, upload the content of the file **x-head.misc.txt** and hold up Type: misc
- create a new form **x-navigation**, upload the content of the file **x-navigation.misc.txt** and hold up Type: misc
- create a new form **x-sidebar**, upload the content of the file **x-sidebar.misc.txt** and hold up Type: misc
- create a new form **x-footer**, upload the content of the file **x-footer.misc.txt** and hold up Type: misc
- create a new form **xx-search**, upload the content of the file **xx-search.misc.txt** and hold up Type: misc
- create a new form **xx-advertisement**, upload the content of the file **xx-advertisement.misc.txt** and modify google adsense kód, hold up Type: misc.

d) Installation of Styles (All Style are located in folder STYLES)

Go to **Presentation -> Style** and

- replace style **default** by content of file **default.txt**

- create a new style, insert the content of the file print.txt into it and called it print

***The other procedure is same for both possibilities:***

I.) Go to **Presentation -> Section** and

- create a new section called **About** and assign the **page about** with the default style. Choose NO for each of the options except in Include in site search? where you choose Yes and SAVE them

- create a new section called **Archive** and assign the **page archive** with the default style. Choose NO for each of the options and SAVE them

II) Go to **Content -> Article** and create a new article called About, set up: Section - about; Staus – sticky and SAVE it

**Congratulation, that´s all.**
